Every veterinarian in the country can introduce themselves comprehensively and completely at any stage of their work expertise in the animal system, and this will be effective in better understanding their abilities and improving the satisfaction of applicants. In this system, it has been considered in various details and specialized categories have been used for better display. Veterinarian professional introduction in categories Professional classification of the activities of a veterinarian is a help to improve the presentation to the applicants. Categorized List of Veterinarians, Veterinarian Doctor, Master Category, Associate Degree, Subcategory, Mother Category, Bachelor Degree, Subcategory, Mother Category, Master's Degree, Subcategory, Mother Category, General Doctorate, Subcategory, Mother Category, Specialized Doctorate, Subcategory, Mother Category, registered categories if the specialty is specified, it can greatly help to improve the display and also meet the needs of the applicant. Choose your mother's category with the veterinarian doctor option and specify the subcategory as well. The address and location of the activity of the veterinarian in this system is a feature called location registration by entering information in the address section, and by registering the location or the mobile activity range of the veterinarian, you can display it on the map with the desired icon of the veterinarian. Your address can be tracked using GPS. Registration of photos in the ad of veterinarian activity with a limited number for free packages, simply after registering the content of the ad, a section at the end of the ad is intended for uploading your photos. It is recommended to upload your photos with a size of 1200 x 700 pixels. High-quality photos with low volume can greatly help to improve the display in search engines like Google. Use color photos related to your services, for example, this ad is about the activities of a veterinarian, and photos of his activities during surgical treatment and other veterinary activities should be considered. Veterinarian, the effect of video in an ad can greatly help to improve your ranking, and consider that the general public can make their final decision better by watching the video, and especially this case has a better performance regarding the introduction of the activities of a veterinarian. To upload a video in your ad You can use the video recording tutorial. It is recommended that your video be less than 3 minutes and ready to be shown as a teaser and have a volume of less than 100 MB. Registering the target in the veterinarian's notice by creating a target, you can have a better display for your services in the animal system. By choosing your target, a small image of the target topic will be displayed next to your ad in the categories. Choosing the target is very important to improve the display

and search in the system, and you should register this feature with previous thinking. Marketing If your veterinarian job advertisement is in the form of marketing and advertising, you can choose this option. The sale of this item is not used in the advertisement of individual activities. . Renting this item is not used in the advertisement of individual activities. .. Notification If your goal is a notification regarding tariffs, discounts, openings, etc., you can target the activity of the veterinarian doctor in this way. The type of service in the registration of the advertisement of the veterinary doctor, the type of service in the ads can be a solution for the specialization of your services. It should be considered that by choosing this option, applicants can find out about important issues with the following titles: Type of service: Main job Type of service: Second job Type of service: Recreational They do not know how to use maps and are not familiar with map reading to benefit from this. The titles registered in this section are as follows: Name of the city, name of the city, zip code, registration of the emergency number of the veterinarian. By registering the emergency number, it is possible to communicate with the veterinarian immediately in case of a problem or an accident that may take the lives of animals. It is related. The matter should be arranged immediately. Registration of the scientific degree of a veterinary doctor. In this section of the advertisement of a veterinarian, you can enter the title of your scientific degree and choose one of the following options: associate master's degree, general doctorate, specialized doctorate. In this section of the ad, respected veterinarians can state the name of the university where they studied and obtained their degree. Register your professional history in the advertisement of the activity of a veterinarian. In this section, there are twelve options to specify your professional activity history as a veterinarian, which is the first option. less than one year and the highest is thirty years and above. It should be noted that the part of the advertisement will be very effective in giving credit to your business. Announcing the visit and face-to-face treatment in the advertisement of the activity of the veterinarian. In this part, you specify that As a veterinarian Do you have the possibility of face-to-face visits and treatment or not? Company registration, if the activity of a veterinary doctor is carried out in the majority of a company, by registering the company details, you can simply increase the timing and characteristics of your ad, or if your collection is not managed in a corporate manner, you can Fill in the details of the company section, except for the company name, which includes the following: Company name: write the company name, logo or brand: the best way to upload the logo size is 250px by 250px. will be . Mobile number: register the mobile number of the company management or the website secretary: the website address in the form of a link can have a good output for advertising your collection. Facebook link: If you as a veterinarian and your collection has a Facebook social network, you can upload the channel or network link. Twitter link: If the veterinarian or the group he is active in has a Twitter link, you can register it in this section. Instagram link: If the veterinarian has Instagram, you can fill this section with a link. Telegram link: If the veterinarian has a Telegram channel or group, you can upload the link in this section. YouTube link: If the veterinarian has a YouTube channel, by adding the channel link, this section can have a good output for your channel. Membership in the National Association: uploading your user link that is active in the forum can have a good output in the field of questions and answers, and applicants can ask you in this section if they have any questions, and if your questions and answers are in the form of You can get a positive result if there is an advertisement in the forum. Education

center channel: If you work in a video education center and receive an education channel, you can share the channel link for applicants, considering that the education center channel can have a good input in the field of science and advertising of your center. Company description: In this section, you can upload a brief description of the veterinarian and the managing company, considering that the description should not exceed five lines. Working hours and activities of the veterinarian In this section, you can record the working hours of the secretary or the veterinarian himself who works on the move, for example, 8:00 to 16:00, the specialized details of the advertisement of the veterinarian by selecting the options. Help the performance of your ads and this section is done simply by clicking on the empty square. It should be considered that the free package is limited in the selection of options and you cannot click on all the options. Choosing the option of being fluent in other languages, choosing language options can greatly help your reputation and efficiency in different places inside and outside the country as a skilled veterinarian and become the basis of your activity in many work groups. Registration of the list of types of diseases that can be treated by the veterinarian. In this section, a list of the types of diseases that can be treated by the veterinarian is presented, which is very effective in raising the awareness of the clients and removes them from confusion, and on the other hand, it shows the scientific and medical credibility. You will be registered for nutritional counseling in the advertisement of the activity of the veterinarian. In this section, a list of the main species of animals is placed, according to the possibilities of nutritional counseling for that particular species, you can check the corresponding option, the list of covered animals and Veterinarian's Expertise In this section, a long list of mostly domestic animals from the five main species of animals is placed along with the image of the animal, which according to the veterinarian's expertise in providing medical services to those animals, ticked the desired option so that applicants regardless of any level of information, even with the help of the image of the ad of the veterinarian they want, they can find the specialized list of the activity of the veterinarian doctor. In this section, the most important part of the ad is the activity of the veterinarian doctor. He chooses no more than two options, the list of vaccinations performed by the veterinarian. In this section, the veterinarian has a list of animal vaccinations, which according to the injection of those types of vaccines, check the corresponding option and give it. It informs applicants about the availability of its vaccination services
